GHI
Formulary**

The following is a list of the most commonly prescribed drugs. It represents an abbreviated version of the drug list (formulary) that is at the core of your pharmacy benefit plan. The list is not all-inclusive and does not guarantee coverage. In addition to using the list, you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate.

PLEASE NOTE: Drugs listed on this document may become non-Preferred if a generic equivalent product becomes available throughout the year. Not all the drugs listed are covered by all pharmacy benefit programs. Check your benefit materials for the specific drugs covered and the copy information for your pharmacy benefit program. For specific questions about your coverage, please call the phone number printed on your ID card.

Key:

Brand name drugs are listed in CAPITAL letters.

Generic drugs are listed in lower case letters.

The symbol* next to a drug signifies brand drug will convert to non-Preferred status when generic is available throughout the year.

The symbol [inj] next to a drug indicates that the drug is available in injectable form only.

The symbol [PA] next to a drug stands for Prior Authorization, which is needed prior to coverage of this drug, plan dependent.

The symbol [ST] next to a drug name stands for Step Therapy which is in place on this drug, plan dependent.

The symbol [DQ] next to a drug stands for Drug Quantity, which is a limitation on amount dispensed.

For the member: Generic medications contain the same active ingredients as their corresponding brand name medications, although they may look different in color or shape. They have been FDA-approved under strict standards.

For the physician: Please prescribe preferred products and allow generic substitutions when medically appropriate.
